LASER CLEANING

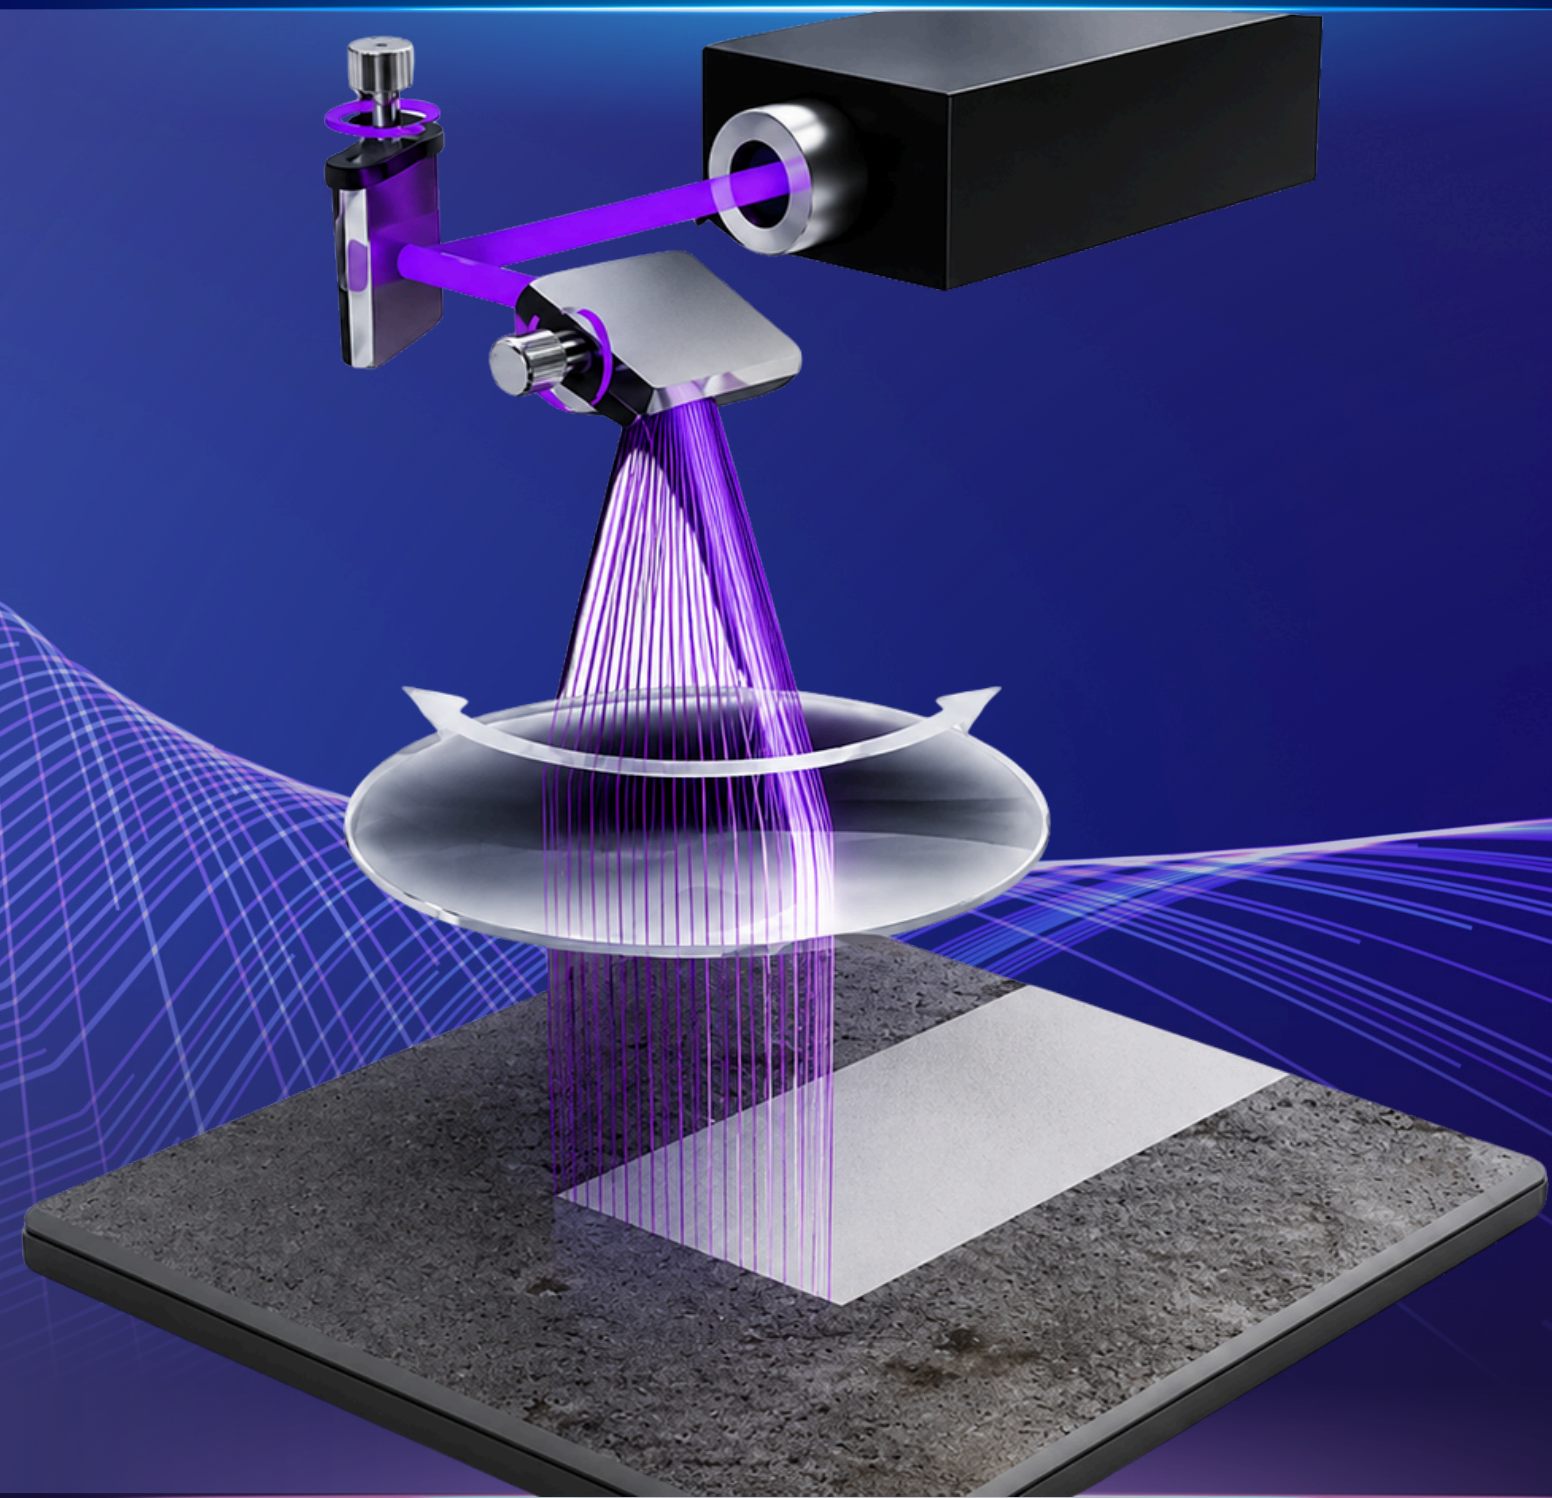

NEXT GENERATION SURFACE CLEANING

Laser Clean Global

HOW LASER CLEANING WORKS

- ✓ NON-CONTACT
- ✓ ECO FRIENDLY
- ✓ ULTRA PRECISION

Types of **LASERS**

There are two main types of laser cleaning systems: Pulse Lasers and Line Lasers.

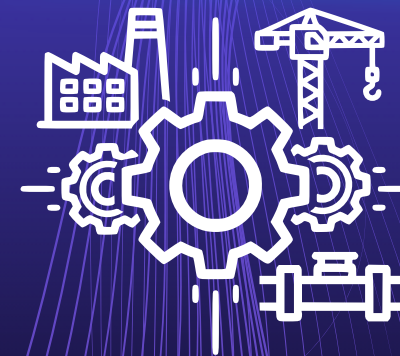

Pulse lasers typically operate with lower power and are ideal for precision cleaning on sensitive surfaces. Line lasers are high-performance industrial systems designed for faster cleaning of larger areas and tougher contamination.

Our machines are categorized based on these two technologies, depending on the required cleaning performance and application type.

Pulse laser

- Delicate surfaces
- Restoration work
- Small industrial tasks

Line laser

- Heavy contamination
- Large surfaces
- High-speed cleaning

OUR SERVICE IN PHUKET

We provide on-site laser cleaning services in Phuket. From first contact to project completion, the entire process can be arranged remotely — fast, simple, and fully personalized. In most cases, all you need is a phone call, and our team handles the rest.

Contact Us

Send us photos or videos of the surface you want cleaned.

On-Site Service

Our team arrives at your location fully equipped and ready to work.

Receive a Quote

We provide a fast and personalized quotation based on your project.

Fast Results

Professional laser cleaning completed quickly, efficiently, and without unnecessary downtime.

PRICING

The cost of laser cleaning depends on several factors, including the level of contamination, the size of the surface, accessibility of the area, and the estimated project duration. Heavily rusted or multi-layer contaminated surfaces may require more time and higher laser power, while sensitive or hard-to-reach areas can also affect the overall pricing.

Because every project is different, we provide personalized quotations based on the specific surface condition and cleaning requirements. Our goal is to offer the most efficient and cost-effective solution for each project.

Starting From

\$6 / m²

Project-Based Pricing

For larger or more complex projects, pricing is calculated individually after evaluating the surface and project conditions.

BECOME OUR PARTNER

Equipment Supply

Professional laser cleaning machines tailored to your business needs.

Know-How & Training

Practical guidance, operational support, and real-world industry experience.

Stable Engineering Support

Continuous technical assistance and remote support whenever you need it.

Website & Marketing

Professional website solutions, branding, and marketing support to help grow your business.
